UVC Media

All UVC media can in principle be printed with UV-curable ink.

Media	Application	Description	Size	Code
UVC				
DecoFrame uv 	Print, fold, hang – picture and frame in one for high quality advertising and decoration	The World Print DecoFrame uv offers you picture and frame in one. Print using digital UV flatbed printers directly onto the board, whose high quality surface promotes the intense colours of your graphics. A few simple folds and the pre-perforated and self-adhesive DecoFrame is assembled into a finished three-dimensional picture, which can be hung straight away thanks to the ready-made hanger.	110 g - 250.0 cm (98') - 300.0 m 110 g - 320.0 cm (98') - 300.0 m	12263144
Frontlit PE uv 	Environmentally friendly banner material made of polyethylene with a guaranteed outdoor durability of up to 1 year	Unbeatable for environmental friendliness: 100% polyethylene, no phthalates, no lead, no PVC. Recyclable but guaranteed UV and weather resistant for up to one year. Your prints radiate with brilliant colours on its satin matt white surface. Thanks to the low glare front side your advertising messages are always clear to read. At 110 g the material is very light but nevertheless extremely robust to handle with excellent elongation.	110 g - 250.0 cm (98') - 300.0 m 110 g - 320.0 cm (98') - 300.0 m	11301799 11792003
Polypropylene Banner 250 uv 	Opaque polypropylene film for low-cost rollups and display applications, predominantly indoor	Good value display film, professional product solution for the production of opaque rollup graphics with UVcuring inks. Prints look vibrant and sharp on the totally reflection-free natural white surface. Unmatched results at an unbeatable price/performance ratio.	250 mic - 105.0 cm (41') - 50.0 m	10762626
Polypropylene Banner 130 uv 	Polypropylene film for Point Of Sale applications, banners and even backlits, predominantly indoor	„Little brother“ to UV Polypropylene Banner 250 uv. Extra thin, extra good value banner, professional product solution for the production of POS applications and even backlits using UV-curing inks. Prints look vibrant and sharp on the totally reflection-free natural white surface. Impressive results at an unbeatable price.	130 mic - 160.0 cm (63') - 50.0 m	19383913
WonderTack uv 	Advertising on smooth, even surfaces. Appliances/casings (e.g. white goods), surfaces in the POS sector	Highly innovative product solution! UVcuring printable, white satin matt polypropylene film, which adheres to smooth, even surfaces without an adhesive. This is possible due to the unique, micro porous suckers on the adhering side. Environmentally friendly, reliable, and reusable again and again.	210 mic - 127.0 cm (50') - 20.0 m	11066845
WonderTack Ghost uv 	Window decoration, advertising on smooth, even surfaces. Appliances/casings (e.g. white goods), surfaces in the POS segment	Brand new, highly innovative product solution! UV-curing printable, high transparency polyester film that adheres to smooth, even surfaces without the use of adhesive. What makes it possible is „WonderTack“, the micro-porous sucker technology on the adhering side. Saves resources and is kind to the environment, because it can be used over and over again.	170 mic - 127.0 cm (50') - 20.0 m	10163808

UVC

WonderTack repositionable media with suction technology

- Easy to position, removable and reusable
- Reliable bond without adhesive, removes without residues
- For all ink systems: uvc, solvent and water-based available
- White polypropylene film

The reverse side of World Print WonderTack can even be wiped down, if required - giving it good durable adhesion, time after time. Perfect for short-term and frequent changes of promotional material at POS.
